### Field of Search:

Dosage form developments: formulation and optimization of protein- and polymer-based nano-drug delivery systems for applicability to alternative administration routes.

Development of pharmaceutical investigation methods (highlighted Raman spectroscopy, HPLC, dynamic light scattering).

Pharmaceutical technology developments: freeze-dried stabilized nano-drug delivery systems.

### Conferences:

10 oral conference presentation

11 conference posters

### Languages:

English: State-recognized C-type intermediate

German: State-recognized C-type superlative

### IT knowledges:

Advanced level IT skills
